

Consultant

Job at AceCone Ceramics, India

Title of the Position: Consultant Engineer

Department: AceCone Ceramics Services

About AceCone

AceCone is a user-centered Ceramic consultancy based in India. We bring real-world evidence to the Ceramics products and services. In short, we help our clients make better, more sustainable products that people actually want to use, and we have a reputation as one of the best at what we do.

Our clients include many big names including Froza Inc., Marcou Artifacts, IKEA, Wal-Mart. We work across all Technology & Management platforms including Turnkey Project, Processing, Product Development, Quality Control, We use all the standard research tools from usability tests to ethnography, but also deploy participatory design, visual thinking and pioneer new tools.

It's a busy time and we're looking for exceptional people to join our team here in Bikaner, If you are intelligent, obsessively curious and excited by designing great products , and you want to work with a group of friendly, talented people, then we might have just the job for you.

About you

Experience & education: *You must have at least 2 years' experience working in a commercial, hands-on Ceramics role, preferably as a consultant. You have a formal Graduation in Ceramics or Material Science, Product Design & Development or related qualification ideally at Masters or PhD level OR you have Best Grades plus years research experience.*

Methodological skills: *You need to have experience expertise and running material tests and analyzing results. Experience of other user research methods would be good. The more, the better!*

Analysis and Design skills: *You have experience gathering data from research, and developing this into real prioritized insights and actionable recommendations. You get your results across in memorable, imaginative, and usable ways.*

Consultancy skills: *You must be able to behave professionally and confidently with clients at all levels and in all situations. Charisma and an ability to present yourself and your work in a calm, clear and engaging manner are essential.*

Personal skills: Working in a small company, you will need to be part of the team and be willing to pitch in and help with anything and to contribute positively to the culture. You have excellent time management skills and can look after a busy workload.

Passion: If you love your field of work and feel genuinely excited, in a slightly nerdish way, by elegant designs that fit into people's lives then you will suit life at AceCone Ceramics.

Other skills: If you can speak other languages, have lived in other countries, know how to strip down and rebuild a PC, a bike, Art work, have any skills to your name whatever they may be, tell us in your CV or covering letter.

What we offer

- Great people to work alongside learn from and grow with
- An opportunity to be part of a growing company that is passionate about what it does
- A chance to work on the most interesting projects with the best client list in the business
- Flexibility, time and funding to pursue your own Research interests and build your name in the community
- Competitive salary, generous holiday allowance and benefits
- Lovely office in Central Bikaner & Jaipur (India)

To apply
